

Table S1

Table S1. CC₅₀ values on PHA-stimulated PBMCs from healthy donor

Agent	CC ₅₀ (μM) ± SD
PEP005	> 100
Birinapant	10.7 ± 0.2

PBMCs (2 x 10⁶ cells/ml) were treated with birinapant or PEP005 and cultured for 3days. Cell viability was measured by WST-8 assay.
